

Kimobetsu Town Disaster Prevention Hazard Map

(Floods, Landslides, and Evacuation shelters)

Revised September 2026

This hazard map is based on a projected maximum rainfall of 425mm over two days.

Please check dangerous areas in advance-your safety depends on it!

Information regarding this disaster prevention hazard map

Map of areas expected to be inundated by floods(maximum expected scale)

Legend for the flood inundation area map

[Disaster prevention hazard map legend]

Legend

- Steep slope collapse (Caution area)
- Steep slope collapse (special alert area)
- Landslide (warning area)
- Landslide (hazard zone)
- Areas where flooding is Expected to cause house collapse, etc. (areas where early evacuation is required)
- Evacuation sites and shelters
- Welfare shelter
- Facilities for people with special needs in Landslide-prone areas
- Facilities for people with special needs in areas expected to be flooded

Legend

Estimated water depth (classification) in case of flooding

- 20.0m or more
- Area between 10.0m and less than 20.0m
- Area between 5.0m and less than 10.0m
- Area between 3.0m and less than 5.0m
- Area between 0.5m and less than 3.0m
- Areas less than 0.5m
- Areas expected to be flooded River with water level notification

[Image of flood depth using flood inundation colors]

[Legend for designated evacuation shelters, etc]

[Designated shelters]

This facility is intended to protect evacuees in the event of large-scale disasters such as earthquakes, wind and floods.

[Designated emergency shelters]

These are evacuation sites for emergency evacuation in the event of imminent danger from earthquakes, wind and flood damage, etc.

[Designated Shelter and Designated Emergency Shelter]

Specified areas within the same site

[Welfare Shelter]

This is a shelter where specialized care and welfare considerations are given to the elderly and people with disabilities who have difficulty living in regular shelters.

1. Description

- (1) Highlights areas in Kimobetsu Town expected to be flooded under maximum anticipated rainfall, in accordance with the Flood Control Act.
- (2) Based on a simulation of flood conditions if the Shiribetsu River overflows, reflecting channel and runoff control facilities as of March 2018.
- (3) Simulation excludes flooding from tributary collapse, rainfall beyond assumptions, and inland water accumulation. Actual conditions may vary.

2. Basic information

This disaster prevention hazard map was created based on the following materials.

- (1) Drawing name: Shiribetsu River System Shiribetsu River Kimobetsu River Flood Inundation Projection Area Map (Planned Scale) (Kyogoku Town, Kimobetsu Town) Dated July 13, 2018 [Hokkaido Official Gazette No. 3000]

Shiribetsu River system, Kimobetsu River Flood inundation predicted area
(maximum predicted scale)
Dated April 15, 2022

- (2) Prepared by: Hokkaido Shiribetsu Regional Development Bureau

Debris flows, landslides, etc.

1. Debris flow danger streams: Streams with a valley topography a riverbed gradient of three degrees or more, where conservation houses are currently located or where residential sites are expected to be built.
2. Areas at risk of collapse due to steep slopes: Areas with a slope of 30 degrees or more and a height of 5m or more, where residential buildings are currently located or where residential buildings are expected to be built.
3. Landslide: A phenomenon in which a part of the land on a gentle slope gradually moves downward. The area is protected by existing houses and is expected to become a residential area.
4. Landslide warning areas are areas where the lives or bodies of residents could be endangered if a landslide occurs.
5. Special landslide warning zones are areas where, in the event of a landslide, damage to buildings is likely to occur and serious harm to life and limb is likely to occur.
6. If you live in a landslide danger zone, be careful during heavy rain, etc., and evacuate early if you sense danger.
7. Landslides can occur even in areas outside of landslide warning zones, so be sure to check the slopes, streams, and evacuation sites around your home.

Disaster prevention weather information released in stages and actions that residents should take

◎Habitually gather disaster information.
Evacuation Guidelines (Cabinet Office, March 2026)

Weather conditions	Information from the Japan Meteorological Agency,etc.		Responses by municipalities	Actions residents should take	Alert Level
Imminent/occurring disaster ↑ Approximately 2 to hours ago ↑ A few hours to about 3hours ago ↑ Half a day to a few hours ago ↑ A few days to about a day ago	River flooding , heavy rain, land slides, storm surges	Kikiikuru	Emergency safety guarantee ✖This in for mation will not necessarily be issued	Life-threatening Immediate safety action! ▪ Safe evacuation is already difficult and lives are in danger ▪ A safer place than where you are now Immediately to	5
	Level5 Emaergency Warning	Emergency			
	< Be sure to evacuate by level 4 ! >				
	Level4 Urgent Warning	High Risk	Evacuation Order The 4th Disaster Prevention System Evacuation Order (Countermeasures Headquarters Measures)	Evacuate everyone from dangerous areas ▪ If a typhoon or other strong wind is expected, complete Evacuation before the strong wind begins to blow.	4
	Level3 Warning	Warning	Evacuation of elderly people, etc. the 3rd Disaster prevention System (Issue an evacuation order. A system that can make decisions)	Elderly people and others should evacuate from dangerous places ▪ People other then the elderly should also refrain from their usual activities as necessary. Prepare to evacuate or evacuate on your own.	3
Level2 Advisory	Advisory	Second Disaster Prevention System (A system to decide whether to issue an evacuation order, for elderiy people, etc.)	Check your own evacuation actions ▪ Hazard map for your home It is important to reaffirm the actual disaster risks and means of obtaining evacuation information .	2	
		The first disaster prevention system (Assign a liaison officer)			
Early Warning Information (Potential warning level)		▪ Take your mental preparation to the level ▪ Confirmation of staff contact system	Im proving disaster preparedness	1
